

EARNED VALUE

Earned value management helps you quantify the performance of a project. It compares costs and schedules to a baseline to determine if the project is on track.

If the charts don't look right, make sure you have set a baseline, assigned costs to tasks or resources, and entered progress.

EARNED VALUE OVER TIME

The project's earned value based on the actual cost (ACWP) is higher than earned then the project is over budget. If planned is higher than earned value, then the project is behind schedule.

[Learn more about earned value](#)

VARIANCE OVER TIME

Cost and schedule variances for the project status date. If CV is negative then, the project is over budget. If SV is positive then the project is ahead of schedule.

INDICES OVER TIME

Cost and schedule performance indices from the start of the project to the current date. The greater the performance index, the greater the saving the project.
